

PV-module BRA-system

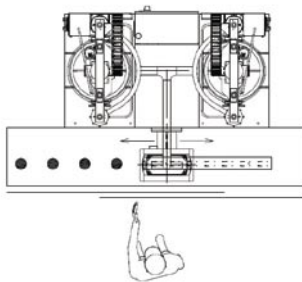

- back-rail application
- semi-automatic
- automated

Product performance

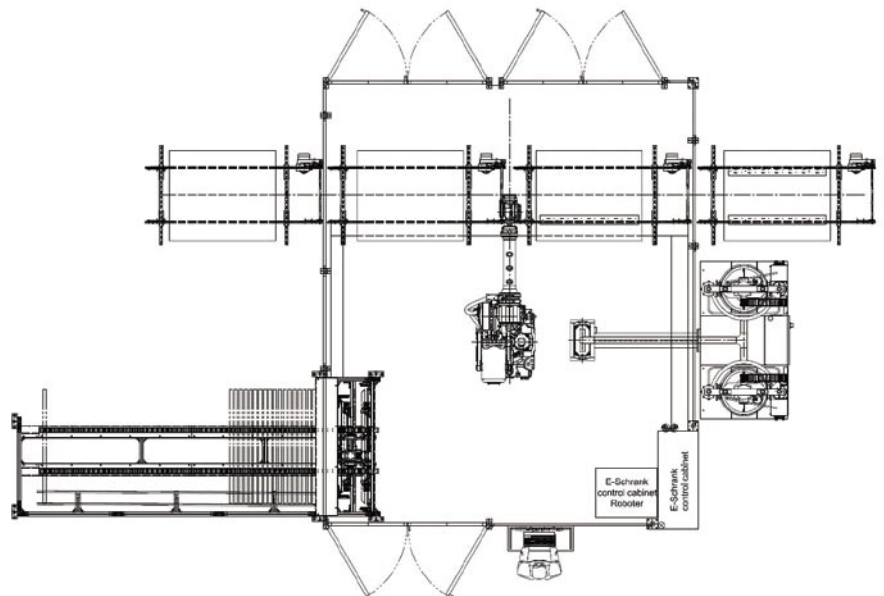

- self-contained production cell: modular setup for integration in manual or automated PV-module production lines
- processing of steel- or aluminum-back-rails in different designs
- integrated back-rail preparation with cleaner
- processing of 1C- or 2C-adhesives; alternatively adhesive tapes
- pressure-controlled and repeat-accurate back-rail application

Exemplary layouts

1) semi-automatic cell

2) automated cell [Gen5, 1/4-size 5.7m²]

3) automated cell [full-size 5.7m²]
